

## How To Take Down

**1.** With partner, slightly lift up two adjacent outer legs, depress snap button and telescope inner legs into outer legs. Repeat on the opposite legs.

Pull Pin

**4.** Release pull pin at each corner by first lifting valance fabric away from slider. With one hand push up on truss near the pull pin, pull the pin out to release. **Note:** It is much easier to release pull pin when the shelter weight has been removed from the pull pin.

**3.** Grasp the top and bottom of diamond on diagonally opposite sides by "close" sticker. Lift the shelter up slightly and shake it while stepping towards your partner until the unit is 3/4 closed. With each partner grasping two outer legs, push frame together to fully close it. Be careful not to pinch fingers.

**4.** Place cover/carry bag over the shelter. Lay shelter on its side. Pull inner legs out slightly exposing caster wheel hole. Insert caster wheels through grommets in bottom of bag and then into the holes on the side of the inner leg near the bottom of the foot.

**5.** Stand shelter up with wheels against the ground and roll for E-Z transport.
